

September 2026

To whom it may Concern

Re: **2025/2364 Directive on Restriction of Use of Certain Hazardous Substances (RoHS)**

We can confirm that all components manufactured and materials used by us do comply with the 2015/863 RoHS directive including exemptions in Annex III as listed below:

Exemptions:

- 6(a)-I (not more than 0.35% Lead in steel)
- 6c (not more than 4% Lead in brass)

*We are aware of the ongoing ECHA review of the RoHS list and we are aware of the extensions applied to the exemptions 6(a)-I and exemption 6(c) will expire on 30th Jun 2027.

We will be monitoring closely to ensure that Guy Raymond Engineering is compliant with appropriate legislation.

Yours Sincerely

Lawrence Daniels
Managing Director
